

Advanced Materials for Biomedical Applications

Table of Contents

MATERIALS FOR TISSUE ENGINEERING, REGENERATION AND REPLACEMENT

Liver Support and Tissue Engineering <i>Y.M. Elçin</i>	3
Biointegrable 3D Polyurethane / -TCP Composites for Bone Reconstruction <i>S. Farè, P. Petrini, M.C. Tanzi, A. Bigi and N. Roveri</i>	17
Ultraviolet Irradiation of Synthetic Polymer/Collagen Blends: Preliminary Results of Atomic Force Microscopy <i>A. Sionkowska, H. Kaczmarek, M. Wisniewski, F. El Feninat and D. Mantovani</i>	27
Environmental Degradation of the Blends of Natural Poly (3-Hydroxybutyrate–CO-3-Hydroxyvalerate) and Atactic Poly[(R,S)-3-Hydroxybutanoic Acid] <i>M. Rutkowska, K. Krasowska, M. Kowalczyk and P. Dacko</i>	41
Grafting of Heparan Sulfate/Vascular Endothelial Growth Factor Complex onto Synthetic Substrates to Improve Hemocompatibility <i>M. Crombez, P. Chevallier, R.C. Gaudreault, D. Mantovani and G. Laroche</i>	49
Insulin Immobilisation onto PTFE Films: Preliminary Results <i>M. Badeau, M. Crombez, P. Chevallier, R.C. Gaudreault, D. Mantovani and G. Laroche</i>	67

SHAPE MEMORY MATERIALS FOR BIOMEDICAL APPLICATIONS

Quality Control and Standardization of Nitinol for Medical Applications <i>V. Brailovski, P. Terriault, S. Prokoshkin, I. Khmelevskaya and E. Ryklina</i>	79
Influence of Porous TiNi Morphology on Mechanical Properties <i>A. Chernyshov, M. Leroux, M. Assad, A. Dujovne and E. Garcia-Belenguer</i>	109
Corrosion Behaviour of a TiNi _{50.8%} Single Crystal <i>A. Manceur, O. Savadogo and L'H. Yahia</i>	121
A Preliminary Investigation on the Aptitude of Shape Memory Polyurethanes as Biomaterials <i>S. Farè, D. Fulgini and M.C. Tanzi</i>	133

HYDROGELS FOR BIOMEDICAL APPLICATIONS

New Biomaterials Based on Modified Chitin and Complex of Chitosan and Hyaluronan <i>D. Bakoš, L. Precnerova, J. Vojtaššak, M. Blaško and L. Danišovič</i>	145
--------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Observations of a Carboxymethylcellulose (CMC) and Glycerine Based Hydrogel Following Implantation in a Rabbit Long Bone <i>K. Ellis and M. Cooper</i>	157
Two Applications of a Polyionic Hydrogel: Enzymes immobilization and Polypeptides-drug Delivery Systems <i>D. Magnin, E. Chornet and S. Dumitriu</i>	167
METALS AND CERAMIC COMPOSITES FOR BIOMEDICAL APPLICATIONS	
Wear Performance of CoCrMo Alloys Used in Hip Orthopaedics <i>R. Varano, S. Yue, J.D. Bobyn and J.B. Medley</i>	181
Magnesium as a Degradable Biomaterial for Cardiovascular Applications: Preliminary Results <i>J. Lévesque, D. Dubé, M. Fiset and D. Mantovani</i>	191
Processing Microstructure and Properties of two-phase Co-Cr-Mo Alloys for Biomedical Applications <i>A. Salinas-Rodriguez and A. Mani-Medrano</i>	201
MEDICAL DEVICES: FROM CLINICS TO ENGINEERING	
Numerical Simulations of Local Pharmacokinetics of a Drug Delivered from an Eluting Stent <i>R. Mongrain, I. Faik, N. Bulman-Fleming, J-C. Tardif, S. Plante and O. Bertrand</i>	213
Thrombosis of Vena Cava Filters: an Analysis of Explanted Filters <i>A. Poirier, L'H. Yahia, V.L. Oliva, S. Lerouge and L.A. Gaboury</i>	225
3D Structural Analysis Computations of Coronary Plaques Using Intravascular Ultrasound (IVUS) <i>R. Mongrain, A. Ranga, O. Bertrand, S. Plante and J-C. Tardif</i>	237
Heart Valves Retrieval Failure Analysis vs. Clinical Data <i>M.F. Brunella, B. Bosi, R. Chiesa, A. Cigada, S. Farè, S. Agati, G. Bruschi and E. Vitali</i>	247
Development of a 3D CAD Model for the Structural Analysis of a Coronary Stent <i>R. Mongrain, E. Aboumansour, S. Plante, O. Bertrand and J-C. Tardif</i>	257
Phosphorylcholine grafted on ePTFE Vascular Prostheses to Improve their Hemocompatibility: An <i>In Vitro</i> Study <i>P. Chevallier, D. Mantovani and G. Laroche</i>	269
Growth Mechanisms in Chiral Nematic Liquid Crystals: Analogies with Biological Fibrous Structures <i>G. De Luca and A.D. Rey</i>	287
Role of Epithelial Cells in Oral Candidiasis <i>M. Rouabhia, J-P. Goulet and P. Chauvin</i>	297
Corrosion Behavior of HA, Ti, and HA-Ti Composite Coated Endodontic Dental Implants in Physiological Environment <i>M.H. Fathi, M. Salehi and V. Mortazavi</i>	315
The Effect of Clinical Procedures on Surface Characteristics and Corrosion Behavior of High Copper Dental Amalgam	327

MEDICAL MATERIALS: SURFACE MODIFICATIONS AND CHARACTERIZATION

Improved Adhesion of DLC and Polymeric Films using Carbon-based Interlayer Coatings <i>C. Côté and A. Sarkissian</i>	341
Characterization of Biocompatible Hydroxyapatite Coatings by Surface Analysis <i>M.P. Casaletto, G.M. Ingo, S. Kaciulis, G. Mattogno, N. Quirici and L. Rimondini</i>	351
Cold Plasma Effects on Spores and Polymers <i>M-C. Crevier, M. Moisan, L'H. Yahia and B. Saoudi</i>	365
Cell Antiadhesion Activities of Ammonium Functionalized Polymeric Materials Obtained by Plasma Treatment and by Grafting Reactions <i>F. Rousset, B. Charleux, J-P. Vairon, M. Tatoulian, F. Arefi-Khonsari, J. Amouroux, J.M. Tixier and J.M. Legeais</i>	377
